

# ZUS

SMART CAR CHARGER

## Getting Started

1. Download the free ZUS app on the App Store or Google Play.
2. Open the ZUS app. Plug ZUS into your car's cigarette lighter. Start the car's engine.
3. ZUS' lights should turn on. ZUS is now ready to connect. Turn on your device's Bluetooth.
4. The app will search for ZUS and automatically connect.
5. Whenever you park your car, ZUS will save your car's location automatically.
6. When you need to find your car, open the app and follow the guidance.

**Component:** One ZUS device

## Important Safety Instructions:

Do not submerge or expose for extended period to water.

Do not place any naked flame sources near the device.

## Compatibility:

iPhone, iPod, iPad, Samsung, Nokia, Samsung Galaxy Tab, Google Nexus, Kindle, Kindle Fire and other devices that charge via USB.

Check your device's manual to learn more about its power requirements.

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions:

(1) this device may not cause harmful interference, and

(2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

—Reorient or relocate the receiving antenna.

—Increase the separation between the equipment and receiver.

—Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

—Consult the dealer or an experienced radio/TV technician for help.
